Mission

To be a player in sustainable chemistry,
driving change to create value for people.

Our Manifesto

We are Versalis, our mission is being an important player
in sustainable chemistry, made by people, for people.

We promote diversity, dialogue, innovation.

We act with pride and responsibility.

We are reliable and solid.

Chemistry is our world.

We create value today and will continue
to do so tomorrow.

Company Overview

Versalis, Eni's chemical company, operates nationally and internationally, offering a wide range of products and solutions – highly diversified and integrated across the entire supply chain – for multiple industrial sectors, including automotive, packaging, construction, agriculture, and household appliances.

In addition to its constantly evolving traditional products, Versalis is committed to a transformation towards a chemistry of the future based on portfolio specialization, circularity, and biochemistry, with the aim of achieving specific decarbonization targets.

Research plays a fundamental role in the company's transformation: with seven research centers, Versalis develops innovative projects and technologies, also through platforms integration and partnerships with various players in the supply chain.

Our Portfolio

BASIC CHEMISTRY AND POLYMERS

Wide range of styrenes, elastomers, and polyethylene
Development of increasingly innovative solutions

OILFIELD CHEMICALS

Proprietary high-performance formulations, specialty solvents, and chemical additives for the Oil & Gas industry

BIOCHEMISTRY

Products and solutions:

- entirely or partially from renewable sources
- compostable and/or biodegradable

CIRCULARITY

Production and solutions:

- sourced, in whole or in part, from recycled raw materials
- from complementary advanced mechanical and chemical recycling technologies for post-consumer and post-industrial plastics

SPECIALIZATION

Special polymers with high added value from molding and compounding

Highlights

TECHNOLOGICAL INNOVATION

+400

patent families

Newer®, technology for producing recycled polystyrene for food packaging

NEWER®

Mechanical recycling polymer production plant

Chemical recycling demo plant with Hoop® technology

hoop®

SUSTAINABILITY

1 Mton

CO₂ emissions reduction (Scope 1 & 2) in Italy

66%

waste recovered/recycled from production activities
